The heating plant is serviced before the start of every winter season, and the boiler logbook is kept in the plant room next to the main gas valve.

Fire doors are checked every month. Any door that does not close by itself is reported to the facilities desk on the same day.

Lifts are inspected by an approved body twice a year, and the inspection certificate is posted inside each car.

Water tanks are cleaned once a year and samples are sent to the laboratory after cleaning for a full analysis.
