Thank you for asking us to quote for digitising your tenancy files. This letter sets out the scope of the work, our fees and the terms that apply.

You hold about 1,150 property files on paper at your head office. They must be kept for six years after a tenancy ends, and the archive room is full.

We propose to prepare a specification for the scanning service and the electronic records system, including a pilot with 300 files and a migration plan.

Our scope does not include the scanning itself or the configuration of the records system. We can quote for these separately once the pilot is complete.

The fixed fee for the specification is EUR 18,500, invoiced in two equal parts. Travel is charged at cost up to a cap of EUR 1,200.
