Service agreement (synthetic)

The monthly fee is EUR 1,200, payable in advance on the first working day of each month.

The provider keeps the systems listed in the schedule running during business hours. Faults reported before noon are answered on the same day; faults reported later are answered by noon on the next working day.

Either party may end this agreement with ninety days' notice in writing. Notice periods start on the day the notice is received. Fees already paid for a month in which the agreement ends are not refunded.

The customer gives the provider access to the premises and systems needed for the service. The provider follows the customer's site rules and keeps passwords and access cards safe.

Changes to this agreement are valid only when both parties sign them. This agreement is governed by the law of the place where the customer has its registered office.
