Goods-in inspection manual (synthetic)

1. Scope

This manual applies to the goods-in inspection of solvent drums at the north warehouse.

2. Responsibilities

The shift lead checks that every drum is inspected before it is put into stock.

3. Sampling

1. Check the label on each incoming drum against the delivery note.
2. Take a sample from the top third of the drum with a clean dip tube.
3. Seal the sample bottle and write the drum number on it.

4. Nonconformities

A drum that fails inspection is moved to the quarantine bay and tagged red.

5. Records

Inspection sheets are kept for five years.
