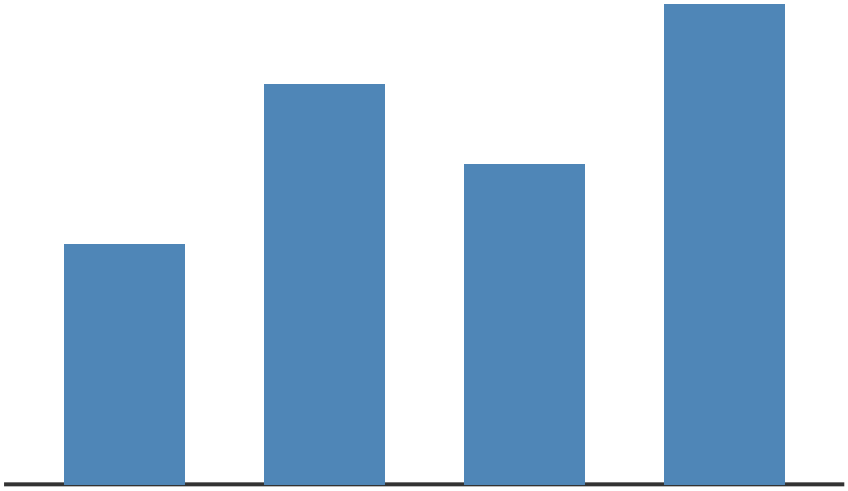
Maintenance schedule for the north building. Routine inspections take place every quarter and cover heating, ventilation and the fire alarm system.

The contract runs for two years and renews automatically unless either party gives notice at least ninety days before the end of the term.



Keys to the plant rooms are kept at the security desk and signed out for each visit. Lost keys are replaced at the cost of the contractor.

Waste oil and used filters are taken away by a licensed carrier. The carrier issues a transfer note that is kept with the visit log.
