Pump isolation (synthetic)

1 Purpose

This procedure sets out how maintenance staff isolate a pump before work starts on it.

2 Tasks

No.	Task	Owner
1	Isolate the pump	Fitter
2	Test the isolation	Supervisor
3	Drain the casing	Fitter

4 Records

The supervisor records each isolation in the permit log, with the lock numbers and the time.

4 Review

This procedure is reviewed every two years or after any incident.
